Good Morning, this is a neighborhood alert from the Somerville Police Department and Tufts University.

This morning Somerville Police and Fire responded to a car fire at 124 Professors Row, and discovered a suspicious note indicating bomb threats at several Tufts University buildings. The fire was extinguished and local and state police remain on scene investigating the bomb threats. At this time the buildings in question are secured until further notice. Residents are advised to remain off campus and to seek alternate routes this morning. Police will remain on scene throughout the morning to continue their investigations. Updated notification will be sent when the area has been cleared.

Thank you.

Joseph W. Casey

Featured Content— Start of Hurricane Season: Near-Normal Atlantic Hurricane Season Predicted

NOAA's Climate Prediction Center says the 2016 Atlantic hurricane season, which runs from June 1 through November 30, will most likely be near-normal, but forecast uncertainty in the climate signals that influence the formation of Atlantic storms make predicting this season particularly difficult. NOAA predicts a 70 percent likelihood of 10 to 16 named storms (winds of 39 mph or higher), of which 4 to 8 could become hurricanes (winds of 74 mph or higher), including 1 to 4 major hurricanes (Category 3, 4 or 5; winds of 111 mph or higher).

ANALYST COMMENT:

The Massachusetts Emergency Management Agency (MEMA) encourages everyone to prepare for hurricanes by: (1) building an emergency kit; (2) creating a plan; and (3) staying informed. MEMA's interactive "Know Your Zone" map can help individuals in coastal communities determine if their home or place of work is in a hurricane evacuation zone. Visit www.mass.gov/knowyourzone for more info.

2016 Atlantic Hurricane Season Outlook

Named storms: 10 - 16
Hurricanes: 4 - 8
Major hurricanes: 1 - 4
